to study the issue of energy allocation systems.

Based on the Supreme Court opinion in Paul Moore v. RealPage Utility Management, Inc., a lawyer should research legislative history by examining the context of the statute, the overall statutory scheme, and archival legislative history of relevant enactments. This includes reviewing committee reports, bill analyses, hearing transcripts, and any other documents that shed light on the legislative intent behind the statute in question [14](#).

Legislative intent carries significant weight in statutory analysis. Courts presume that the legislature intends its enactments to operate as a consistent and harmonious body of law. Therefore, in interpreting statutes, courts seek to reconcile and harmonize the parts of a statute to align with the legislature's purpose, aim, or policy in enacting the law [11](#). Understanding legislative intent helps courts apply the law in a manner that reflects the lawmakers' goals and objectives when passing the statute.

ChatGPT v. GPT4All

Prompt: What are some alternatives to guardianship?

The screenshot shows a dark-themed AI interface with the model name "Mistral OpenOrca" at the top. The conversation log starts with a pink message from the user asking about alternatives to guardianship. The AI responds with a green message, listing five alternatives:

1. General Financial Power of Attorney: This document allows an individual to appoint someone else (an agent) to make financial decisions on their behalf, such as managing bank accounts or paying bills. The power of attorney becomes effective immediately upon signing, but can be made durable so that it remains in effect even if the principal becomes incapacitated.
2. Health Care Power of Attorney: Also known as a Medical Durable Power of Attorney or Advance Directive, this document allows an individual to appoint someone else (an agent) to make medical decisions on their behalf when they are unable to do so themselves due to illness or injury. This can include consenting to medical treatments and procedures, deciding on the level of care received in a healthcare facility, and making end-of-life choices.
3. Revocable Living Trust: A revocable living trust is created by an individual while they are still competent and allows them to transfer their assets into the trust for management during their lifetime. Upon incapacity or death, a successor trustee takes over responsibility for managing the trust according to the terms of the document. This can provide a smoother transition in handling financial matters without the need for guardianship.
4. Supported Decision-Making: This is an alternative approach that focuses on helping individuals with disabilities make their own decisions by providing them with necessary supports and accommodations, rather than appointing someone else to make those decisions for them. It emphasizes self-determination and autonomy while ensuring the individual's safety and well-being.
5. Representative Payee: For individuals who are unable to manage their own finances due to a disability or other circumstances, Social Security Administration can appoint a representative payee to handle these matters on their behalf. This person is responsible for managing the beneficiary's funds according to established guidelines and reporting to SSA about how those funds were used.

Below the list, a note states: "It is important to consult with an attorney experienced in estate planning and elder law when considering alternatives to guardianship, as each individual's situation may be different and require a tailored approach."

At the bottom, there are three numbered footnotes:

1. Date: 2024, January 02. In adult-guardianship-process-1-alternatives-to-guardianship.html. [Context](#)
2. Date: 2024, January 02. In adult-guardianship-process-1-alternatives-to-guardianship.html. [Context](#)
3. Date: 2024, January 02. In adult-guardianship.html. [Context](#)

Buttons at the bottom include "Regenerate response" and a send icon. A text input field says "Send a message..."

ChatGPT v. GPT4All

Prompt: What are some alternatives to guardianship?

You

what are some alternatives to guardianship?

People's Law Library January 2024

In Maryland, a guardian should only be appointed if there are no less restrictive alternatives available. During court guardianship proceedings, the court will determine whether a less restrictive alternative is available. Therefore, it's important to consider alternatives prior to beginning guardianship proceedings.

However, the specific document does not list these alternatives in detail. For more comprehensive information, it would be necessary to refer to additional resources or legal texts.

Prompt: What are some alternatives to guardianship?

Alternatives to Guardianship

There are numerous alternatives to guardianship for both personal and financial matters. Here are some alternatives:

Financial Decisions

- **Powers of Attorney:** A power of attorney grants someone legal authority to act on another person's behalf. This includes managing finances and property. However, mental competency is required to create a power of attorney. If a person becomes disabled before establishing a power of attorney, it may not be an option.
- **Representative Payee:** A representative payee can be an individual or organization. They are appointed to manage income or benefits received from government agencies and some private pension companies. They act on behalf of a minor, or an adult, who cannot manage their benefits due to illness or disability.
- **Trusts:** Trusts can be used to manage assets for a disabled person. Trusts offer more flexibility and control compared to guardianship.
- **ABLE Accounts:** ABLE accounts are specialized savings accounts for individuals with disabilities. They allow for saving and investing without impacting eligibility for certain government benefits.

Healthcare Decisions

- **Advance Directives:** An advance directive gives legal authority to another person (agent) to make healthcare decisions on your behalf. The agent will have access to your medical records, communicate with your care providers, and make decisions about your care. Advance directives can include a living will, which outlines the care you desire in a terminal or incurable condition.
- **Surrogate Decision-Making:** When a person becomes incapacitated and does not have an advance directive (or their agent is unavailable), the surrogate decision-making process allows healthcare providers to turn to another person to make medical decisions. Maryland law outlines who qualifies as a surrogate.

Supported Decision-Making

This approach involves an arrangement where an individual relies on assistance from another person or group (supporters) to make some or all decisions. Supported decision-making can be informal or a formal written agreement. You identify your

Adult Guardianship

What is an adult guardianship? Types of Guardians When would an adult need a guardian? How does a court decide what to do? Consider Alternatives

What happens when someone becomes disabled and can no longer manage their personal and/or financial affairs? Perhaps that person has dementia, suffered a stroke, or has some other ailment or injury that renders that person unable to act. That person's personal and/or financial affairs must be put in order and kept in order, so that the personal and/or financial needs of that person can be taken care of as long as possible.

Often, the answer to these questions is to initiate a guardianship proceeding on behalf of that disabled adult. Guardianship is a court proceeding. When an adult is unable to make personal decisions, such as medical decisions, or to handle his or her own property, a court can appoint a guardian.

What is an adult guardianship?

Adult guardianship is a formal court process that is used to appoint someone ("the guardian") to act on behalf of the court to manage a disabled person's care or property. A guardianship proceeding is necessary when:

1. a physician, psychologist, or certified clinical social worker determines that a disabled person is unable to make responsible decisions concerning his or her

Healthcare Decisions

- **Advance Directives:** An advance directive gives legal authority to another person (agent) to make healthcare decisions on your behalf. The agent will have access to your medical records, communicate with your care providers, and make decisions about your care. Advance directives can include a living will, which outlines the care you desire in a terminal or incurable condition.
- **Surrogate Decision-Making:** When a person becomes incapacitated and does not have an advance directive (or their agent is unavailable), the surrogate decision-making process allows healthcare providers to turn to another person to make medical decisions. Maryland law outlines who qualifies as a surrogate.

Supported Decision-Making

This approach involves an arrangement where an individual relies on assistance from another person or group (supporters) to make some or all decisions. Supported decision-making can be informal or a formal written agreement. You identify your supporters, the type of assistance they'll provide, and the decisions they'll help you make. The supporters help you understand situations and options, but they do not make decisions for you.

Private Services

Private services offer a range of options that may meet an adult's needs. Some examples include:

- Alternative housing arrangements, such as assisted living, continuing care retirement communities, or group housing
- In-home aides

Important Note: If you are considering alternatives to guardianship, it's crucial to consult with an attorney to determine the most appropriate option for your specific situation.

Show data insights

Show a suggestion for a formula column

How can I highlight, filter, and sort data? C

Please add a column reflecting what salaries would be next year if everyone got either a 5% raise or a \$2,000 raise, whichever is better for them.

149/2000

Here's 1 formula column to review and insert:

Next Year Salary

Calculates the estimated salary for the next year by taking the maximum value between a 5% increase in the current salary and a fixed increase of 2000 (dollars). This ensures that each employee receives at least a minimum raise, while also allowing for a percentage-based increase for higher salaries.

fx

```
=MAX([@Salary] * 1.05,  
[@Salary] + 2000)
```

Computes the estimated salary for the next year for each employee in the table by using the following formula:

- Multiplies the value in the "Salary" column by 1.05 to find a 5% increase.
- Adds 2000 to the value in the "Salary" column to find a fixed increase of 2000 (2000 dollars).
- Uses the MAX function to find the maximum of the two calculated values and returns the higher of the two as the result.
- Formats the result as a number with a thousand separator and zero decimal places.

[Hide explanation ^](#)

AI-generated content may be incorrect

[Insert column](#)

Here's 1 formula column to review and insert:

Next Year Salary

Calculates the next year's salary for each employee by increasing their current salary by either 5% or \$2000 (dollars), whichever is greater.

fx

```
=IF([@Salary]*1.05>  
[@Salary]+2000,[@Salary]*1.05,  
[@Salary]+2000)
```

Calculates the estimated salary for the next year for each employee in the table by using the following formula:

- Uses the IF function to compare the result of multiplying the value in the "Salary" column by 1.05 (a 5% increase) with the result of adding 2000 (a fixed increase of 2000 dollars) to the value in the "Salary" column.
- If the result of the multiplication is greater than the result of the addition, the formula returns the result of the multiplication. Otherwise, it returns the result of the addition.
- Formats the result as a number with a thousand separator and zero decimal places.

Legal Summit & Annual Meeting 2024
Jun 5-7, 2024 - Roland E. Powell Convention Center, Ocean City, MD

Happy Friday David-

The 2024 Legal Summit & Annual Meeting is almost here! Whether this is your first Legal Summit or your 50th, we're excited for you to join us very soon in Ocean City, MD.

Hi, I'm Angela Munro, the Section Manager, and I am happy to be your Legal Summit Ambassador for our 2024 Event. I'll be sending you little tidbits over the next week to make sure you have a great experience filled with new connections, lots of learning, and of course the fun that you've come to associate with Legal Summit.

Save this! Legal Summit is 12 Days Away– What should you ...

Summary by Copilot

The 2024 Legal Summit & Annual Meeting will take place from June 5-7, 2024 at the Roland E. Powell Convention Center in Ocean City, MD.

Registration opens at 8:30 am on Wednesday, with programming beginning at 10 am.

The MSBA Learn app can be used to plan the itinerary, create a networking profile, and make connections.

There are networking opportunities throughout the week at various locations, including the ALOFT, Seacrets Distillery, and Dry Dock 28.

Happy Friday

AI-generated content may be incorrect

The 2024 Legal Summit & Annual Meeting is almost here! Whether this is your first Legal Summit or your 50th, we're excited for you to join us very soon in Ocean City, MD.

Hi, I'm Angela Munro, the Section Manager, and I am happy to be your Legal Summit Ambassador for our 2024 Event. I'll be sending you little tidbits over the next week to make sure you have a great experience filled with new connections, lots of learning, and of course the fun that you've come to associate with Legal Summit.

- Fill in your networking profile and tap Continue. Your profile information will help you connect with other people during the event!
- Now, browse or use the search bar to find 2024 Legal Summit & Annual Meeting, then tap on it to join.
- You're in! Feel free to start exploring. If you have any questions about the Event App, or if you have trouble logging in, don't hesitate to reach out.

Not an app person or need to participate from your laptop? Visit the Legal Summit 2024 Web App at www.msba.org/legalsummitapp

I can't wait to see you at Legal Summit 2024.
If you have any questions, please reach out to my friends on our member services team at membership@msba.org or through our online chat in the bottom right of our website.

Sincerely,
Angela Munro
Section Manager, MSBA

p.s. Will we see you at the Maryland Bar Foundation Annual meeting directly before our President's Reception on Thursday night? If you still need tickets to this separately ticketed event, [click here](#) and support our friends at Maryland Bar Foundation!

Draft with Copilot

I need a survey for lawyers who have watched my technology presentation, to see if it met their needs, and where it can be improved.

Please gather their name, affiliation and email address.

Use a 5-point Likert scale to ask them to assess the following questions:

Was the presentation interesting?

Did they find the solutions provided relevant to their work?

Would they recommend the presentation to a colleague?

Use a yes/no format to ask for this feedback:

Did they learn at least one thing they will try out at the office next week?

Finally, set up a free text question to gather any additional feedback.

Thank you!

Copilot 365 Teams

To prepare for the MLSC/OAG meeting, here are some key points and related content that might be useful:

- The meeting is scheduled for **today at 10:00 AM** and will last until 10:30 AM. It will be a Zoom meeting, and the details for joining have been provided in the invite ¹
- Michelle Siri** and [REDACTED] are among the attendees ¹
- There was a recent email exchange regarding a **prospective grantee** for MLSC, which might be a topic of discussion ²
- There is also a document titled "**23 08.27.21 Access to Counsel Requirements**" that could be relevant to the meeting's agenda ³

It would be beneficial to review these materials and be prepared to discuss the grant under contemplation and any related requirements or updates. If there are specific points or questions you have in mind, it's a good idea to note them down to ensure they are addressed during the meeting. Good luck with your preparation!

Does MLSC have a COVID policy?

Based on the search results, it appears that the Maryland Legal Services Corporation (MLSC) has implemented policies in response to the COVID-19 pandemic, particularly regarding the signing of affidavits and intake procedures.

- The "MLSC- Internal Control Policy_affidavits signing_FINAL.docx" updated in February 2022, outlines the procedure for signing client eligibility and income affidavits during the pandemic. It mentions that [REDACTED] Legal Services staff members will determine client eligibility at intake and that clients may email signed MLSC forms with an e-signature. [\[1\]](#)
- A Teams message from yesterday afternoon includes a conversation where [REDACTED] suggested adding a COVID policy to the personnel manual, and Michelle Siri asked if MLSC had one in place. You, Dave Pantzer, responded that you've been looking but not finding anything, indicating that there may not be a formal COVID policy document available. [\[2\]](#)
- The "virtual intake policy" document from March 2022 describes a new policy for online and virtual clinics due to COVID-19 limitations. It requires staff to take income information over the phone or virtually for clinics longer than 30 minutes and to document why a client is unable to sign in person. [\[3\]](#)

These documents suggest that MLSC has adapted its procedures to accommodate the challenges posed by the COVID-19 pandemic, although a formal, standalone COVID policy document may not exist. If you need further assistance or specific details from these documents, please let me know.

Summary and smart chapters **My meeting coach**

Summary

The team discussed the use of AI in recording and summarizing grantee meetings, the implementation of an API for OpenAI's text generator at Legal Aid, and the development of a chat bot for various purposes. They also explored the potential of combining various AI APIs, the use of AI for tasks such as rewriting letters and simplifying panel descriptions, and the challenges and potential solutions related to understanding and utilizing APIs. Lastly, they touched on topics related to voice technology, the weaponization of technology, and the use of Unreal Engine for creating AI and ... [View All](#)

Database Credentials, Single Sign-On, Chat GPT API

Russ and Dave discussed the current database of credentials and the potential implementation of single sign-on in the future. They also talked about the use of the API for Chat GPT, which doesn't save any data for training and only holds user interaction data for 30 days. Russ mentioned that a 0 data retention policy is expected to be launched in June. Dave raised concerns about users potentially sharing confidential information, to which Russ responded that they have a prompt helper section in Chat GPT that advises against this. They concluded that while there's some concern, the current policy seems to be adequate for their use case.

got it caged so that the the Si that the Llm. Can't learn from the prompts.

Russ Bloomquist 06:06

It cannot.

So yeah, using the Api for for Chat Gpt, it doesn't save any of your data for training, and it only according to their terms of use. It only saves their data on their server for a very short time, like 30 days.

Oh.

Dave Pantzer, MLSC 06:22

What, what does it save for 30 days.

Russ Bloomquist 06:24

Just anything that you're interacting with it for saved on their servers for 30 days, like the things that's generating and the inputs. But I believe in June, they're launching a 0 data retention policy with 5. So I think, starting in June, it will have a 0 data retention policy. So none of our data will be saved there at all.

Resume autoscrolling

Next Steps

1. Russ will share the link to the base version of the Chatbot he created for the team to explore and use as a starting point for their own projects.
2. Matthew will consider developing a publicly consumable version of the instructions he gave to his law students for their AI projects, to share with other teams and organizations.

Create a single member LLC operating agreement for Oregon.

Paxton
Certainly, here is a summary of the key provisions typically included in a single member LLC operating agreement for Oregon:

- **Formation**: The agreement should state the name of the LLC, the principal place of business, and the fact that the LLC is formed under Oregon laws.
- **Member**: As a single member LLC, the agreement should identify the sole member and their capital contribution.
- **Management**: It should outline how the member has full control...

describ abstract

Parties: The parties involved in the case are the plaintiff, Johnathan Melnick, and the defendant, Baltimore and Ohio Railroad Company.

Introduction: The case presents the issue of whether a landowner has a cause of action against an adjoining landowner when trees, vines, roots, and other plants or plant debris from the adjoining landowner's property encroach upon and cause damage to the landowner's property.

Background: Johnathan Melnick purchased a tract of land in Baltimore, which shares a boundary with a railroad right-of-way owned by the Baltimore and Ohio Railroad Company. Melnick's property experienced damage due to leaves, limbs, and plant growth from the Railroad's property, causing clogged drains, standing water, and roof deterioration.

Procedural History: Melnick brought the action in the Circuit Court for Baltimore City, seeking damages for the injury to his property. The circuit court granted the defendant's motion for summary judgment, and Melnick appealed to the Court of Special Appeals, which affirmed the decision.

Issues Presented: The specific legal question is whether a landowner has a cause of action against an adjoining landowner when vegetation from the adjoining property causes damage.

Analysis: The court discussed various rules governing the situation, including the self-help remedy, limitations on entering the adjoining landowner's property, and different approaches adopted by courts in other jurisdictions.

Holding: The court affirmed the decision of the Court of Special Appeals, holding that the Massachusetts Rule, which limits the adjoining landowner's remedy to self-help, is preferable. The court declined to impose liability on the adjoining landowner for the natural processes of trees, plants, roots, and vines.

Conclusion: The court affirmed the judgment of the Court of Special Appeals, holding that the Massachusetts Rule is the preferred approach and declining to impose liability on the adjoining landowner for the natural processes of vegetation.

Opinion Type: majority

Author: ELDRIDGE, Judge.

AI Summarized Opinion

This case involves a dispute between a landowner and an adjoining landowner over the encroachment of trees, vines, roots, and other plants or plant debris onto the plaintiff's property causing damage. The plaintiff's property shares a boundary with a railroad right-of-way owned by the Baltimore and Ohio Railroad Company. Melnick's building suffered damage due to leaves and plant debris, including clogged drains, standing water, and roof deterioration.

Also, if you're interested we'd also be happy to give you a demo and a preview of the new citation checker, which should be ready in a week or two.

Access to Justice Conference UMB Westminster Hall 10-11-16

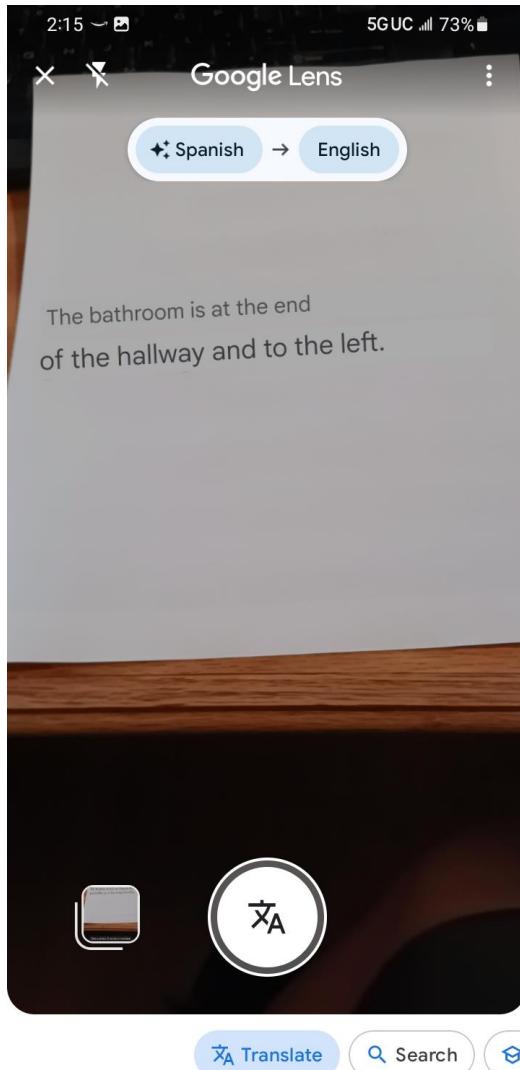

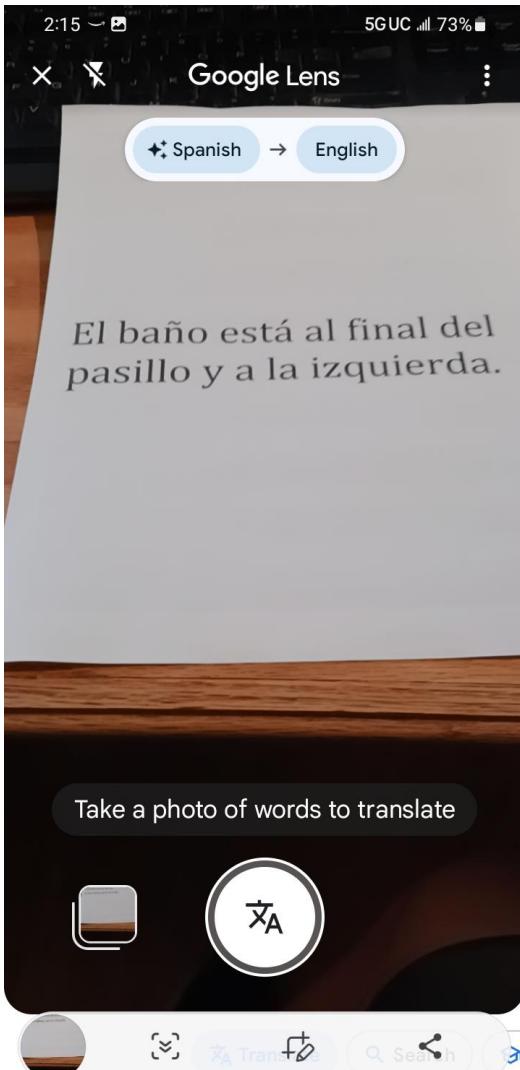

The video successfully grabs attention with an relatable hook sentence. It discusses the important issue of cost and affordability of legal services, but lacks a clear connection between limited scope services and the overall message. More details and examples would improve completeness. The speaker's perspective adds a valuable and personal touch, making it relatable for viewers. While the topic is relevant, the video doesn't align with current trend topics on social media.

Most people want the certainty of knowing what the legal services will cost them I also found that most of them are willing to pay for their legal services However they don't want to have to forego other essential things like food or shelter or healthcare in order to get legal...

Image analysis – Claude.ai

Can you describe this picture to me?

This picture shows a small neighborhood or residential area. In the foreground, there is a brick entrance sign that says "Willow Village Trailer Park". There are bare trees lining the sides of the road, indicating it is likely during the winter or early spring season. A car can be seen parked on the side of the road near the entrance sign. The overall scene depicts a modest trailer park community setting.

The artificial intelligence tool ChatGPT blocked by a government order.
- Text:** Italy's data protection authority said OpenAI unlawfully collected personal data from users and did not have an age-verification system in place to prevent minors from being exposed to illicit material.
- Text:** Italy is the first government to ban ChatGPT as a result of privacy concerns. In China, North Korea, Russia and Iran, the service is unavailable because OpenAI decided not to make it accessible.
- Text:** Italy's decision is a sign of the policy challenges emerging for the developers of cutting-edge A.I. after the release of ChatGPT. The program has dazzled users with its ability to draft essays, engage in humanlike conversations and perform more complex tasks like writing computer code, but it has raised alarms about the spread of misinformation, the effects on employment and broader risks to society.
- Text:** This week, more than 1,000 technology leaders and researchers called for a moratorium on development of the most advanced A.I. systems so that safety policies could be put in place. The Center for A.I. and Digital Policy, an advocacy group pushing for the ethical use of technology, has asked the U.S. Federal Trade Commission to block OpenAI from releasing new commercial versions of ChatGPT.
- Text:** In Italy, regulators have told OpenAI to block internet users in the country from gaining access to ChatGPT until the company turns over additional information. The company has 20 days to provide the agency with the material and possible remedies before a final decision can be made about the future of the product in the country.
- Text:** Regulators cited a March 20 data breach that exposed conversations and the payment details of some users. The agency said OpenAI could be fined up to 20 million euros (about \$22 million) or 4 percent of its worldwide annual revenue.
- Text:** In a statement, OpenAI said it had disabled ChatGPT for users in Italy and that it was committed to protecting people's privacy.
- Text:** "We actively work to reduce personal data in training our A.I. systems like ChatGPT because we want our A.I. to learn about the world, not about private individuals," the company said. "We also believe that A.I. regulation is necessary."
- Text:** As of 5 p.m. on Friday in Italy, word had not yet reached the chatbot that it would be blocked in the country. When asked by a user there if it would be banned in Italy because of privacy concerns, ChatGPT replied, "There should be no concerns."
- Text:** "I am an artificial intelligence language model that can be accessed from anywhere in the world as long as there is an internet connection," the chatbot said.

- Header:** ChatGPT Is Banned in Italy Over Privacy Concerns
- Text:** The artificial intelligence tool ChatGPT was temporarily banned in Italy on Friday, the first known instance of the chatbot being blocked by a government order.
- Text:** Italy's data protection authority said OpenAI, the California company that makes ChatGPT, unlawfully collected personal data from users and did not have an age-verification system in place to prevent minors from being exposed to illicit material.
- Text:** Italy is the first government to ban ChatGPT as a result of privacy concerns. In China, North Korea, Russia and Iran, the service is unavailable because OpenAI decided not to make it accessible.
- Text:** Italy's decision is a sign of the policy challenges emerging for the developers of cutting-edge A.I. after the release of ChatGPT. The program has dazzled users with its ability to draft essays, engage in humanlike conversations and perform more complex tasks like writing computer code, but it has raised alarms about the spread of misinformation, the effects on employment and broader risks to society.
- Text:** This week, more than 1,000 technology leaders and researchers called for a moratorium on development of the most advanced A.I. systems so that safety policies could be put in place. The Center for A.I. and Digital Policy, an advocacy group pushing for the ethical use of technology, has asked the U.S. Federal Trade Commission to block OpenAI from releasing new commercial versions of ChatGPT.
- Text:** In Italy, regulators have told OpenAI to block internet users in the country from gaining access to ChatGPT until the company turns over additional information. The company has 20 days to provide the agency with the material and possible remedies before a final decision can be made about the future of the product in the country.
- Text:** Regulators cited a March 20 data breach that exposed conversations and the payment details of some users. The agency said OpenAI could be fined up to 20 million euros (about \$22 million) or 4 percent of its worldwide annual revenue.
